- Saturday birthdays: David Gamez, Maite Lopez
- Monday birthdays: Mateo Lopez, Ms. Leticia!

### Principal's Message

A strategy often used at our school is the turn-and-talk. The turn-and-talk gives students the opportunity to share their thinking process with each other, before being asked to share out what they know/think. It also gives scholars an opportunity to interact with each other, which builds on the sense of community in the classroom, plus it allows them to practice their social skills. This strategy helps build scholars' language skills as both listening and speaking skills are employed, but in a more "low stakes" way. Finally, it keeps the scholars engaged in the lesson, as everyone has something a task.

Photos are from Kenia Perez' and Nubia Yaruro's First Grade classrooms during a Knowledge lesson on The Human Body. Many teachers have commented on how interested the scholars are in learning from the Knowledge lessons provided in CLKA and Caminos, our elementary Language Arts curricula from the publisher, Amplify. Knowledge-based lang. arts curricula are gaining momentum, most often credited to the research made popular by the book, *The Knowledge Gap*, by Natalie Wexler.
