**HIV AIDS**  
AWARENESS  
MONTH

Throughout the day this past Wednesday, middle school scholars had the opportunity to learn more about the career of an actuary thanks to Mario Viramontes (Mrs. V's nephew via Zoom). All groups did a great job, learning more about the job responsibilities, education/experience requirements, perks, and the alternate divisibility rule of 11.

With that being said, between Mrs. V and Mrs. Garcia, we will be bringing in speakers at various points throughout the school year to expose our MS scholars to new/different career choices from members of our community (local and beyond) with a focus on how math applies in their everyday life/career.

Our next scheduled speaker will be next Friday, 12/15 during our regularly scheduled house meeting time. Scott Tavlin (aka. Scotty from Magic 94.9) has graciously volunteered to speak to our scholars about his career as a morning show radio host.

Coincidentally, Ms. Diana has also scheduled a presentation by a CPA on the morning of the 15th for 8th graders.
