Principal's Message

It's a new year and while many have set new personal goals for the upcoming year, there is one scholar who has had a personal goal for herself as long as Ms. Johnson has known her. Nahomi Alonzo has set out to be the best mathematician she can be. Nahomi is a self starter; a scholar who is able to work effectively without needing to be told what to do. She has a proactive personality and is a go-getter. She sets a goal and works towards it both at school and at home. She has a great attitude and that's why this 3rd grader is in the 7th grade ALEKS program. Nahomi, you are truly a rock star. We can't wait to see where your talents take you.
