Principal's Message

An administrative review by the Florida Department of Agriculture and Consumer Service (FDACS) was conducted of WCA's kitchen last week. The assessment was designed to evaluate various aspects of our operations to ensure compliance with pertinent regulations, policies, and standards. The evaluation covered procurement processes, resource management, civil rights, professional standards, food safety, meal pattern compliance, point of service and meal claiming procedures, Fresh Fruit and Vegetable Program (FFVP), afterschool snack program, financial accountability, and staff standards. We are delighted to share that our kitchen manager, Ms. Guille and her team received their tentative results which revealed no discrepancies or findings. Congratulations to the kitchen staff for their hard work which enabled Wimauma to not only meet but exceed the FDACS standards for excellence. A shout out also to Illiana Montez, Coordinator of Wellness and the NSLP for the Charter schools.

Well done team!
